OPERATION SAFE CHILD

A FREE CHILD I.D. PROGRAM

Parents should download, print, fill out and bring the safe child form with them to expedite the process.

When a child goes missing, every minute is precious. Law enforcement needs accurate information and quickly.

The quality of that information can make all the difference in locating a child. The Operation Safe Child program provides parents with an identification card for their children containing pertinent physical information to give law enforcement officials a head start on a missing child.

EQUIPMENT:

Using equipment that contains the latest digital fingerprinting technology and high-resolution photography, our office can work with your school or group to provide free Safe Child Cards for parents

WHAT IS ON THE CARD:

The cards contain a child's name, biographical information, fingerprint images of both index fingers and a high-resolution digital photo. In addition, the fingerprints of that child will be included in a special search file and compared against all incoming fingerprints submitted to the agency.

The CORE office of Nassau County has successfully produced over 10,000 cards for children in Nassau County and Assemblyman Blumencranz is bringing this event to the Hicksville Public Library.

The service is FREE and we are looking forward to seeing you there!
