# Protecting You From Unaffordable Energy Mandates

**Albany's push to fully electrify heating and transportation may sound good—but without balance, it could cost you.**

- The average customer could see bills rise by about \$600 over the next three years<sup>1</sup>.
- No new natural gas hookups allowed in most new buildings even if it's more affordable<sup>2</sup>.
- Farmland is increasingly being bought for large solar projects, driving up land costs for farmers and diminishing our state's agricultural production<sup>3</sup>.

**That's not sustainable for seniors, families, or small businesses.**

## What I am doing to help:

- ✦ Fighting for smart, affordable energy policies that work for everyone. It's time to restore energy choice in New York.
- ✦ **A6260** – Require a full affordability study on renewable energy with regular updates.
- ✦ **A6152-A** – Demand monthly cost/benefit reports to be fully transparent on the impact on your bills.
- ✦ **A5395** – Make sure environmental rules balance costs and benefits for you.

For more information on this or any other state matter, contact Andrea's district office at:
