

# VACCINATIONS SAVE LIVES!

There have already been **measles outbreaks** in over 10 states – including upstate **New York** – in 2019.

## Top 3 Reasons to Vaccinate:

### 1. **Vaccines Work!**

The MMR vaccine has been in use for over 40 years and measles was nearly eliminated from the U.S. in 2000.

### 2. **Herd Immunity Protects**

If a high percentage of the population is vaccinated, we can protect those who can't be vaccinated, including infants and those with autoimmune diseases.

### 3. **Keeps You Healthy**

Vaccines prepare your body to fight disease to keep you active and flourishing.

**ASSEMBLYMAN PAT BURKE STRONGLY URGES YOU TO GET VACCINATED AND IS WORKING TO PROTECT OUR COMMUNITY'S HEALTH BY SPONSORING LEGISLATION THAT WOULD ENSURE ALL SCHOOL-AGE CHILDREN GET VACCINATED (A.2371)**
