

# COMMON CORE MATH

$$32 - 12 = 12 + 3 = 15$$

ALBANY

$$15 + 5 = 20$$

CAN'T

$$20 + 10 = 30$$

SOLVE

$$30 + 2 = 32$$

THIS

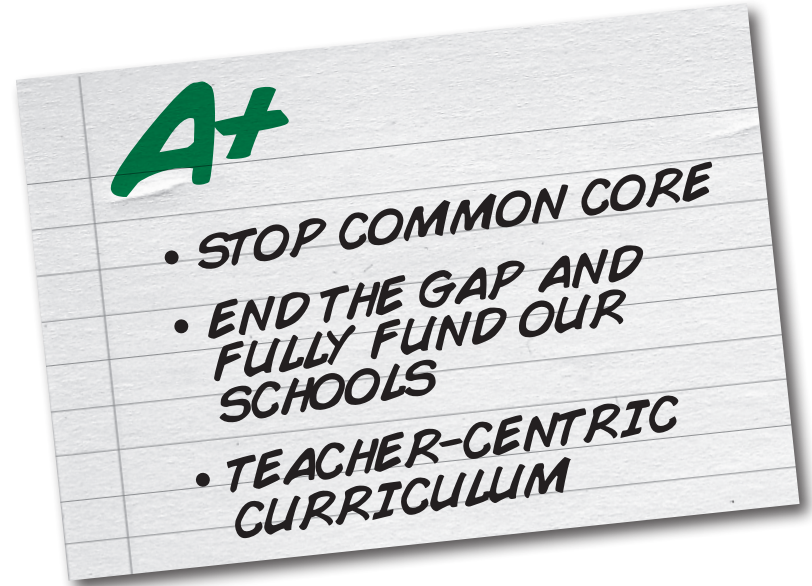

PROBLEM.

---

?

# THE ANSWER IS SIMPLE

Along the way, our state lost its way in running our schools. Common Core reduces our teachers to nothing more than test distributors, judged on their effectiveness more from test scores than whether or not our kids have learned and grown. When it came time to cut the budget, downstate sided with the special interests and furthered the career ambitions of bureaucrats instead of our children. It's time we started to respect teachers as professionals. Our schools deserve the funding necessary to provide for our children, and we need to unleash the creativity and ingenuity our teachers possess. I promise I will continue to fight for OUR children, OUR teachers, and OUR schools. Together, we can fix what ails our education system.
